

Brand identity guidelines

Brand system, usage rules, assets, and applications

VERSION 1.0 / 2026

An identity for digital territory

Clarity, global reach, and on-chain belonging.

Country. Presence. Ownership.

domains.country brings country-linked digital identities and domains into a trusted experience. The symbol combines an open C - access and territory - with a central point representing address, origin, and presence.

CLARITY

Few elements
and immediate
recognition.

CONNECTION

A system
connecting
territory and
digital identity.

TRUST

Precise geometry
with a modern
institutional voice.

Signature family

Choose the version for the available space, not for isolated aesthetic preference.

PRIMARY / STACKED

HORIZONTAL

ICON

WORDMARK .COUNTRY

Symbol structure

The open C keeps the brand dynamic; the point always remains centered.

PROPORTIONS

1.00x outer diameter

0.63x inner diameter

0.32x point diameter

36 deg half opening of the C

Do not redraw, rotate, or move the point. Always build applications from the master files supplied in this pack.

Clear space and minimum size

The x unit equals the diameter of the orange point.

MINIMUM SIZES

Digital icon **16 px**

Digital wordmark **96 px wide**

Full signature **160 px wide**

Print **28 mm wide**

At very small favicon sizes, use the icon only. Do not use the wordmark below 96 px.

Brand palette

The gradient leads the system; orange marks location and action.

Official gradient: #00A7E8 -> #25C7D9 -> #5EEBB9, diagonally from bottom left to top right. Orange never enters the gradient; reserve it for the two points.

A direct system with editorial contrast

Inter drives the interface; Instrument Serif creates moments of voice and authority.

Inter

Interface, data, navigation, and functional copy

ABCDEFGHIJKLMNOPQRSTUVWXYZ

abcdefghijklmnopqrstuvwxyz 0123456789

Instrument Serif

Headlines, manifestos, and editorial communication

Your digital territory starts here.

Logo: a custom wordmark built on an extra-bold geometric sans-serif structure. Do not type or rebuild the signature; use the supplied files.

Positive and negative versions

Prioritize contrast and legibility. On photography, use visually quiet areas.

What not to do

Consistency builds recognition.

X Do not change the gradient

Avoid colors outside the palette.

X Do not move the point

It stays at the geometric center.

X Do not distort

Always preserve the proportions.

X Do not add effects

No shadows, glows, or outlines.

X Do not rotate the symbol

The opening always points right.

X Do not reduce clear space

Respect the x protection area.

Files included with these guidelines

SVG

- Stacked logo
- Horizontal logo
- Icon
- .country wordmark
- Primary, negative, and mono

PNG

- Transparent backgrounds
- Negative variations
- Favicons 16-512 px
- Navy and white grounds
- High resolution

TOKENS

- HEX and RGB colors
- Official gradient
- Typography
- Clear-space rules
- Usage README

Note: the gradient follows the Harmony color reference supplied by the client; review co-branding uses separately.
